

1.Code program

```
1 public class nilaimaksimum{
2     public static void main(String[] args){
3         byte a= Byte.MAX_VALUE;
4         int b=Integer.MAX_VALUE;
5         float c=Float.MAX_VALUE;
6         double d=Double.MAX_VALUE;
7
8         System.out.println("ini byte "+a);
9         System.out.println ("ini integer "+b);
10        System.out.println ("ini float "+c);
11        System.out.println ("ini double "+d);
12    }
13 }
```

2.Output

```
C:\WINDOWS\system32\cmd.exe

E:\Kuliah\Semester2\PD1\praktikum>java nilaimaksimum
ini byte 127
ini integer 2147483647
ini float 3.4028235E38
ini double 1.7976931348623157E308

E:\Kuliah\Semester2\PD1\praktikum>
```
